

## Overview:

An integrated project of care and education using a working model of best practice called ICE (Integrated Care & Education) and caters for approx. 60 young people who are referred and identified as at risk.

We operate all year round, providing a home away from home for the children and young people who attend. Participants receive a meal every day, get their homework completed. They engage in specific developmental programmes such as hygiene, counselling, play therapy etc. and through a youth work approach, take part in programmed activities. i.e. personal & social development, crafts, cooking, swimming, canoeing, hill walking and residential.

A leadership programme is run for young people to create a cycle of community leaders and activists.
