

Overview:

Donnycarney Youth Project provides a wraparound service to the local community across all the strands of our service (youth project, youth justice project, addiction service, child & family service). We promote and encourage inclusion throughout our service.

We strive to break down barriers and we value diversity and inclusiveness in all that we do. We encourage and support positive choices and changes in life. We place the people attending our service at the heart of everything we do.

We empower children, youths, adults and families to fulfil their ambition and reach their full potential

We are a service within the community that shares common community development principles. We are responsive to the needs of our youths, adults, families and an ever-changing society.
