

Overview:

The St John Bosco Youth Work Programme is a community-based service that provides a wide range of quality non-formal educational programmes and activities for local young people, delivered in an out of school hours setting and including evening, weekends and during school holidays.

Our provision is developed to meet the social, personal and developmental needs of young people while providing a safe, inclusive, rights-based and young person-centred environment that is accessible to all young people.

Our service provides a broad variety of needs-based activities and programmes that include a youth café style drop-in service, structured group programmes, youth leadership initiatives, adventure sports programmes, youth residentials, community art projects and individual support programmes.
