

Overview:

The FORUM Adolescent Support Programme is a youth service for young people between the ages of 10 and 24 years old who are experiencing social isolation, communication or behavioural and/or mental health difficulties.

The programme aims to develop locally based youth initiatives and programmes that improve the lives of young people in North West Connemara. The project believes that all young people should be valued members of our society and our community. We promote a partnership approach between adults and young people and endeavour to support young people to make informed decisions on issues that impact on their lives.

The work is carried out in group settings and includes personal development programmes, summer camps, youth cafes, and youth led community development programmes.
