

## Overview:

All the young people involved with the HYLs are at the centre of any decisions that are made because we believe that young people should be allowed to exercise responsibility over their own choices and actions.

The UBU funding will particularly concentrate on individual YP who come from rural backgrounds and who are finding it difficult with community services.

We will also be engaging these YP into full residential weekends, evening activities, summer programmes, mid-term break programmes and camping trips. We hope that these YP will continue to be involved in other community services with the support that UBU worker will provide.

We will be taking referrals from all sources from Community.
