Overview:

The 3 O Clock project delivers academic, social and creative programmes to young people aged 10-18. The primary focus of the project is personal & social development and education provided in a safe environment for young people.

The project aims to increase levels of literacy in an afterschool setting with young people who require development of creative and expressive skills. The project develops and supports this through the promotion of self-confidence and self-esteem, to further increase the young people's longevity within the formal education system.
