

Overview:

YMCA PAKT (Parents and Kids Together) offers family youth work to young people and their parents, aged 10 - 24yrs.

We run afterschool programmes every day which offer fun, engaging & creative sessions where young people have a voice and can participate in their own community.

The programme puts a focus on health and wellbeing, global justice; building social skills and confidence with young people while supporting them to voice what they might like to change within their lives e.g. through youth leadership programmes.

Whenever a young person is experiencing particular challenges, we offer the young person and their family additional supports to help them overcome these challenges.

A youth advisory group is elected each year to steer the programme.
