

Overview:

SWICN Youth Service provides young people with an environment to experiment and develop skills through the use of technology and exploring creativity. Our target group is young people aged between 10 and 24 living in the Liberties area of Dublin 8.

We promote values of equality and respect and we support the developmental needs of each young person. We help young people to find their interests and build on their strengths.

We support them as individuals through their transition from adolescence to adulthood and help them to make their own choices, particularly when it comes to issues and decisions that impact their lives.
