

## Overview:

Ballybough Youth Service aims to empower young people to make informed decisions so as to become active participants in their own lives and in their local community.

We work with young people aged 10-24 years who live or attend school in the local area. The central theme to our approach is fulfilling potential. We operate in the late afternoons, evening time and day time during school holidays to provide a fun, nurturing and safe space for young people.

The service provides a wide-ranging variety of formal and informal group programmes including recreational activities, developmental activities and residentials. We also support and advocate on behalf of the young people on a 1:1 basis.
