

## Overview:

The Aim of the Children and Young People's Programme is to provide a safe space where Young People come together to communicate, respect and share time with one another while enjoying a range of specific cultural, educational, diverse and fun activities for all.

Southside Travellers Children & Young Peoples Programme operates from a Critical Social & Education Model to provide targeted and generic youth programmes for Traveller young people and their settled counterparts in Dun Laoghaire Rathdown. All our programmes are individually assessed, selected and tailored for young people and their needs. Our focus is to address all with any emerging needs presenting for our Traveller young people. We design develop and deliver programmes which are culturally appropriate that promote positive Traveller awareness, enhance self-respect, encourages pride and acknowledgement of the Traveller community.

Within our group we seek to build relationships of trust and positive regard through focused developmental programmes and activities.
